Practice Shoes

Qty _____

You should be able to feel the floor with the tip of your toes when you point your shoes and you want them snug so they keep you back in your heel and not fall forward but do not wear them so tight you cannot feel the blood flowing.

Note:

Your shoes should fit snug but not pinching or cutting. They will stretch after wear.

****Women's shoes will stretch out around the ball and toe area, the tighter the more they will stretch.****

For NARROW feet please choose style 204 and for WIDER feet please choose style 266.

Step 2/4: Select your accessories!

Shoe Brushes
